Documentation in the clinical record must support the level of service as coded and billed.

The **Key Components - History, Examination**, and **Medical Decision Making -** must be considered in determining the appropriate code (level of service) to be assigned for a given visit.

History

type of patient		type of history	<u>details of History</u>				
new	est.		HPI	ROS	other history		
	99211		M.D. presence not required, minimal problem, typically 5 minute service				
99201	99212	problem focused	brief (1-3 elements)				
99202	99213	exp. prob. focused	brief (1-3 elements)	prob. pertinent (1 system)			
99203	99214	detailed	ext. (≥4 elements)	extended (2-9 systems)	pertinent (1 area)		
99204		comprehensive	ext. (≥4 elements)	complete (≥10 systems)	complete (≥ 2 areas)		
99205	99215	comprehensive	ext. (≥4 elements)	complete (≥10 systems)	complete (≥ 2 areas)		

Examination

type of patient type of exam		type of exam	details of Examination		
new	new est.				
	99211		exam may not be necessary		
99201	99212	problem focused	limited - affected area or organ system		
99202	99213	exp. prob. focused	limited - affected area / organ system + other related / symptomatic areas		
99203	99214	detailed	extended of affected area / organ system + related / symptomatic areas		
99204		comprehensive	general multi-system exam or complete exam of single organ system		
99205	99215	comprehensive	general multi-system exam or complete exam of single organ system		

Medical Decision Making

type of patient		type of	details of Medical Decision Making				
		decision making	# of diagnoses /	amount/complexity			
new	est.		management options	of data	morbidity / mortality		
	99211		may not require medical decision making				
99201		straightforward	minimal	minimal	minimal		
99202	99212	straightforward	minimal	minimal	minimal		
99203	99213	low complexity	limited	limited	low		
99204	99214	moderate complex.	multiple	multiple	moderate		
99205	99215	high complexity	extensive	extensive	high		

Note: for <u>new</u> patients, <u>all three</u> <u>key components</u> must meet or exceed the above requirements for a given level of service; for <u>established</u> patients, <u>two</u> of the three key components must meet or exceed the requirements.

Details of History					
HPI elements (8):	ROS systems (14):				
location	symptoms (e.g. cough)				
quality	eyes				
severity	ears/nose/throat/mouth				
duration	cardiovascular				
timing	respiratory				
context	gastrointestinal				
modifying factors	genitourinary				
assoc. signs/symptoms	musculoskeletal				
	integumentary				
other history areas	neurologic				
(req. for 99203/14 & up)	psychiatric				
past history	endocrine				
family history	hematologic/lymphatic				
social history	allergic/immunologic				

Details of Examination					
body areas:	organ systems:				
head, including face neck chest, inc. breasts, axillae abdomen genitalia, groin, buttocks back, including spine each extremity	constitutional (vital signs, general) eyes ears, nose, throat, mouth cardiovascular respiratory gastrointestinal genitourinary musculoskeletal integumentary neurologic psychiatric hematologic/lymphatic /immunologic				

- four additional factors may be considered in determining the appropriate code (level of service) for a visit:
 - 1. nature of the presenting problem (minimal, self-limited/minor, low, moderate, or high severity)
 - 2. coordination of care with other health care professionals *
 - 3. counseling
 - 4. time see chart below for "typical" time spent face-to-face with patient/family for the various levels of service

	5 min.	10 min.	15 min.	20 min.	25 min.	30 min.	40 min.	45 min.	60 min.
new patient		99201		99202		99203		99204	99205
est. patient	99211	99212	99213		99214		99215		

^{*} when counseling or coordination of care comprises more than 50% of the visit or service rendered, time is the key factor in determining the appropriate code and the total time spent should be clearly documented.
